Herald — Issues

Field	Value
Revision	30
Created	2026-05-20
Last modified	2026-05-28
Status	active
Status summary	r30 (v0.6.0 Wave 7 T12 — operator guide; Wave 7 CODE-COMPLETE) marks HRD-121 Open→in_progress. docs/guides/MESSENGER_CHANNELS.md ships as the operator-facing entry point for the multi-channel messenger framework — 610 lines, 11 sections covering architecture (commons.Channel outbound vs commons_messaging/channels.Channel inbound; ASCII fan-in diagram), HERALD_CHANNELS selector (fail-loud on unknown), Telegram + Slack live-setup walkthroughs (BotFather + api.slack.com/apps including Socket Mode app-token), §107 token-redaction security note for xoxb-/xapp- (citing TestSlack_Send_ErrorDoesNotLeakToken), per-channel inbox isolation, self-filter contract, URL schemes, "add a new channel" implementer checklist + "what you do NOT touch" companion (the framework's hot paths come for free), 10-entry troubleshooting cookbook, 6-checklist pre-deploy audit, full HRD/spec cross-references. Generated 3 siblings (.html/.pdf/.docx) via REGEN_ALL=1 scripts/export_docs.sh. Wave 7 (T1-T12) is now code-complete: HRD-110..114 (framework, already Fixed pre-session) + HRD-115 (slack adapter Socket Mode, 54d4316) + HRD-116 (qaherald slack MessengerClient + builder, 6811114) + HRD-117 (spec V3 r12→r13, 7f1b043) + HRD-118 (e2e E124-E131, 17ecd0b) + HRD-119 (paired §1.1 mutation gate 4/0, 6737040) + HRD-120 (multi-channel §11.4.85 stress+chaos 12/12, 86dfa1e) + HRD-121 (this row). Wave 7 HRDs stay in_progress pending operator-live Slack evidence (mirrors Wave 6's v0.4.0 deferred-to-T13b pattern); v0.6.0 tag is operator-gated on live docs/qa/HRD-115-LIVE-*/workspace evidence per §107.x. Prior r29 (v0.6.0 Wave 7 T11 — multi-channel §11.4.85 stress+chaos) marked HRD-120 Open→in_progress. Extended pherald/cmd/pherald/listen_stress_chaos_test.go (HRD-126's single-channel scaffold) with two W7-specific multi-channel tests: TestListen_MultiChannel_StressBurst (2 channels × 200 concurrent events → 400 unique IDs all dispatched exactly once + per-channel attribution via perChannelCountingReplier keyed on rcpt.Channel proves the channelRouter doesn't cross-wire; ~9-19k events/s under -race) + TestListen_MultiChannel_ChaosOneChannelDies_OtherKeepsGoing (the fan-in concurrency proof — tgram errors immediately, slack ticks 50 events at 2ms;

Field	Value
	assertion conjunction ≥ 5 slack dispatches landed BEFORE tgram fail-loud teardown AND the tgram error is tagged channel="tgram-stub" + subscribe → only true under a CONCURRENT goroutine orchestration, not a strictly-serial one). runListen contract: fail-loud-tears-down-siblings (pherald/cmd/pherald/listen.go:387-398); per-channel supervised restart is a deferred Wave 8 design and the doc-comment warns against silent change. 12/12 PASS over -race -count=3 (3 iterations × 2 new + 2 sibling HRD-126 tests); race-detector clean. Evidence anchors multichannel_no_drop_under_burst=1 (stress) + multichannel_concurrency_proven=1 (chaos) at docs/qa/HRD-120-20260528T110000Z/. Prior r28 (v0.6.0 Wave 7 T10 — paired §1.1 mutation gate) marked HRD-119 Open→in_progress. tests/test_wave7_mutation_meta.sh ships 3 paired hermetic mutations against the Wave 7 multi-channel framework — M1 blank IsSelfEcho (echo-loop hazard), M2 drop slack channels.Register in init() (registry-resolution broken), M3 drop slack thread_ts append (reply threading degrades) — each mutated build observed FAIL on the matching e2e detector + restored byte-for-byte + post-restore PASS. New TestSlackRegisteredViaInit detector added to slack_test.go (it asserts channels.Names() contains "slack" — the only test that would FAIL under M2 specifically; without it M2 would silently "no tests to run" PASS-bluff). Gate run = 4 PASS / 0 FAIL (3 mutations + 1 quiescence assertion, no MUTATED W7 - residue in 3 production target files post-restore). Reuses Wave 6 canonical lockfile + trap + assert_restored + pre-flight guard verbatim. FOREGROUND-ONLY (§107.y / feedback_no_concurrent_mutation_gates operator mandate). Prior r27 (v0.6.0 Wave 7 T9 — e2e multi-channel invariants) marked HRD-118 Open→in_progress. scripts/e2e_bluff_hunt.sh gains E124-E131 (8 invariants anchored to live test names already shipped in HRD-110..117): E124 channels registry (resolve + unknown-errors), E125 tgram self-filter post-Wave-7 generalization (TestSubscribeBotSelfFilter), E126 slack adapter (TestSlackSatisfiesChannel + auth.test + chat.postMessage + registry wiring + sc_anchor to T6 docs/qa), E127 LIVE Slack triple-guarded (HERALD_SLACK_BOT_TOKEN + HERALD_SLACK_CHANNEL_ID + grep TestSlack_Live_Send — the third guard prevents the §107 "no tests to run = exit 0 = PASS-bluff" gotcha when env is set but no live-test exists), E128 per-channel inbox isolation + content-addressed idempotency, E129 generalized IsSelfEcho (Username + UserID + empty-self echo-loop hazard), E130 multi-channel pherald listen wiring (TestListenWiresHandlerAndExitsOnCancel), E131 qaherald messenger.Build dispatch (tgram + slack + unknown-errors-loud + sc_anchor to T7 docs/qa). Prior r26 (v0.6.0 Wave 7 T8 — spec V3 r12→r13) marked HRD-117 Open→in_progress. Spec edits document the already-shipped Wave 7 framework + Slack: §11.0 gains the inbound-runtime extension note (commons_messaging/channels.Channel embeds commons.Channel + SendReplyGeneric + BotSelfIdentity + DownloadAttachment + init()-registered registry + generalized IsSelfEcho via `SelfIdentity{Kind: IdentityUsername
Issues	HRD-008, HRD-015, HRD-019..HRD-025, HRD-029..HRD-056, HRD-081, HRD-085..HRD-090, HRD-115..HRD-121, HRD-131 37 open / in-progress workable items. r17 (v1.0.0 Batch A): HRD-018 (commons_constitution package — Evaluator+emit+migrations+bundle-hash+mode-ladder, completing the constitution_audit write-through that was the remaining §107 PASS-bluff: RunOutcome.Audited set true with nothing persisted), HRD-026 (bundle-hash now persisted on every emitted event AND audit row for replay), HRD-027 (mode-ladder runtime config + 3 admin REST endpoints GET/PUT /v1/compliance/modes[:rule_id]) closed atomically Task→done, migrated
Issues summary	

Field	Value
	Issues→Fixed per §11.4.19. Evidence docs/qa/HRD-018-20260527T142556Z/ (real-PG emit→persist + admin-REST flip round-trips + §11.4.85 stress 512 emit→persist no-lost-writes + chaos 960 concurrent flips). Prior r16: HRD-122..HRD-130 (GAP-3 §11.4.85 stress+chaos suite) closed atomically as Completed + HRD-132 (Runner idempotency-window bug) closed as Fixed — 11 rows migrated Issues→Fixed; HRD-131 (SQLite SSoT migration Phase 1) remains OPEN (Phases 2-6 follow-on). r15: HRD-100 closed atomically (Wave 6 pherald inbound runtime — code-doc closure; live evidence operator-pending → T10b). r14: substrate upgrade only (Wave 4b TOON; no HRDs migrated). r12: HRD-016 closed atomically (Wave 3b pherald Runner live + e2e E37-E42 PASS or honest SKIP-with-reason when PG :24100 absent). r11: HRD-011 (Telegram live) closed atomically with live message_id=5 evidence. r10 doc-cleanup renumbered HRD-093 → HRD-099. r9: HRD-028 + HRD-098 closed (Wave 3a). Carry-over to Wave 3c: HRD-024 (iherald paging), HRD-033 (destructive-guard body), HRD-018..027 flavor-specific bindings, plus the rest of the §43 command catalogue. HRD-001..HRD-007, HRD-009, HRD-009b, HRD-010, HRD-011, HRD-012, HRD-013, HRD-014, HRD-016, HRD-017, HRD-018, HRD-026, HRD-027, HRD-028, HRD-080, HRD-092, HRD-093, HRD-094, HRD-095, HRD-096, HRD-097, HRD-098, HRD-099, HRD-100, HRD-110, HRD-111, HRD-112, HRD-113, HRD-114, HRD-122, HRD-123, HRD-124, HRD-125, HRD-126, HRD-127, HRD-128, HRD-129, HRD-130, HRD-132

Per Universal §11.4.74 every new row carries a Catalogue-Check line in its References cell (one of reuse|extend|no-match <org/repo>@<sha>). For HRDs whose catalogue-check is still pending, the row records no-match (2026-05-20) — operators reviewing the implementation PR will re-verify.

ID	Type	Status	Criticality	Title
HRD-015	task	open	low	Inheritance gate I8 invariants for Go scaffold (go.work + commons/typ passes) cherald constitution bindings — cherald/internal/bindin cherald-owned §42.3 rules as concrete commons_constitution. through 5 event classes
HRD-019	task	in_progress	high	(.policy.violation/.gate.failed/.gate.recovered/. over the Batch-A emit+persist+audit foundation; POST /v1/compl surface drives detect→emit→persist→audit, visible on the existing GE pull surface. Vertical-slice bespoke detectors landed (§11.4.29 naming

Criticality Title

HRD-020 task in_progress high

§11.4.44 doc-revision-header, §11.4.18 script-docs, §11.4.73 spec-drift remaining 25 rules use the shared marker-check mechanism (verdict de catalogue command / sweep) with the full emit-routing framework in place. remaining bespoke detector is per-rule follow-up.

sherald host-safety + repo-safety constitution bindings — sherald bindings Pipeline registers the 15 sherald-owned §42.3 host/repo-safety §11.4.24/.26/.32/.36/.41/.47/.71, §12.1/.2/.3/.6) as concrete commons_constitution.Evaluator impls routed through 6 S (.host.safety.breach/.repo.safety.breach/.gate.re over the Batch-A emit+persist+audit foundation, mirroring the proven pattern. The 3 named DETECTION hooks landed as REAL pure class: detector (§9.1: rm/git-reset/clean without backup → .repo.safety interceptor (§11.4.41/§9.2: force-push without merge-first OR session- .repo.safety.breach), mem-budget watcher (§12.6: reported u .host.safety.breach) — plus forbidden-host-op (§12.1) + prer remaining rows. CRITICAL §12-safety: every detector DETECTS+RE string description; NONE performs the destructive op, force-pushes, s allocates memory (the mem-budget watcher reads a fabricated fraction §43 command bodies (HRD-033/046/056) supply the live op-intercept

HRD-021 task in_progress middle

bherald CI/test bindings — bherald/internal/bindings P bherald-owned §42.3 CI/test gate-result rules (§1, §1.1, §11.4.2/.3/.4/.5/.7/.9/.13/.14/.24/.27/.30/.39/.43/.46/.48–.52/.67) as con commons_constitution.Evaluator impls routed through 3 e (.gate.failed/.gate.recovered via the build/test gate-result .policy.violation + .repo.safety.breach for the shared row) over the Batch-A emit+persist+audit foundation, mirroring the pr Pipeline pattern. bherald is the BUILD/CI flavor; it emits CI/test gate- that integrate with the consuming project's CI workflow. 3 bespoke pu result classification (§1/§11.4.50 — PASS/FAIL/flaky from a recorded .gate.failed/.gate.recovered), test-tier-verify (§11.4.27/§4 matrix; a missing tier FAILs), anti-bluff-PASS detection (§11.4.2/.5 — WITHOUT a captured-evidence artefact is a §11.4 PASS-bluff → FAI shared marker-check mechanism (verdict decided upstream by the §43 full emit-routing framework in place.

HRD-022 task in_progress middle

rherald release constitution bindings — rherald/internal/b registers the 4 rherald-owned §42.3 release-lifecycle rules (§4 tag mirr multi-format export [shared with cherald], §11.4.38 installable-asset ev retest before release tag) as concrete commons_constitution.Ev through 2 event classes (.release.gate.blocked via the existin ReleaseGateBlocked emitter surface for §4/§11.4.38/§11.4.40 + for the shared §5 changelog row; a release recovery maps to the shared companion since the release class family has no distinct "recovered" le emit+persist+audit foundation, mirroring the proven HRD-019/020/02 the RELEASE flavor. 4 bespoke PURE detectors landed: tag-mirror-pa parent but missing on any owned mirror, with_tag<mirrors, → .release.gate.blocked), changelog-conformance (§5 — non- changelog OR stale multi-format export → .policy.violation), (§11.4.40 CRITICAL — tag attempted without a green all-8-§40.2-tier .release.gate.blocked), installable-asset-evidence (§11.4.38 - install check → .release.gate.blocked). CRITICAL §12-safe

ID	Type	Status	Criticality	Title
				CLASSIFIES a recorded release-op outcome string; NONE tags, push/downloads, or installs — the live release-op interception is scope-locked (HRD-031/032/045).
HRD-023	task	in_progress	middle	pherald project bindings (§2 commit+push, §3 submodule propagation §11.4.11/.15/.21/.22/.34/.37/.42/.55/.66/.71/.74) — Batch B: pherald bindings/ Pipeline + §42.3-owned rule set + 5 bespoke PURE detectors / discipline / submodule-propagation-order / pre-push-fetch-guard / fetch-through the commons_constitution Evaluator+audit foundation; -race -count=3 green. Live op-interception deferred to §43 HRD-029/030/043/044/049/053.
HRD-024	task	in_progress	middle	iherald constitution-rule escalation bindings (§11.4.10/.10.A credential + §11.4.66 operator-blocked escalation) — Batch B: iherald/inter Pipeline routing .credential.leak (forced-critical) + .policy detectors wired through commons_constitution Evaluator+audit; -race -count=3 green. no-real-secret attestation. Live paging deferred to §43 / HRD-024-paging
HRD-025	task	in_progress	low	scherald scheduled-audit bindings (§11.4.45 periodic Status.md sweep compliance digest) — Batch B: scherald/internal/bindings .policy.violation + 3 bespoke detectors (status-sweep / digest-through commons_constitution Evaluator+audit; -race -count=3 green. scheduler deferred to §43 HRD-047.
HRD-029	task	in_progress	middle	§2 pherald commit-push — single-entripoint locked commit + C: implemented as gitops command (§11.4.74 wrap of git binary); --ent hermetic temp-repo tests -race green
HRD-030	task	in_progress	middle	§3 pherald submodule propagate — owned-submodule wall Batch C: implemented as gitops command (§11.4.74 wrap of git binary) binding; hermetic temp-repo tests -race green
HRD-031	task	in_progress	middle	§4 rherald tag mirror — assert tag exists on every owned sub implemented as rherald §43 release command (rherald/cmd/rherald_release_cmds.go) feeding the HRD-022 rherald binding; reuses shared hermetic -race green
HRD-032	task	in_progress	low	§5 rherald changelog generate — Conventional Commits -<v>.md + multi-format export — Batch C: implemented as rherald §43 (rherald/cmd/rherald/release_cmds.go) feeding the HRD-022 rherald binding; reuses shared commons/gitops; hermetic -race green
HRD-033	task	in_progress	high	§9.1 sherald destructive guard <op> — wrap rm/git-reset prerequisite checks — Batch C: implemented as sherald §43 command (sherald/sysops_cmds.go) feeding the HRD-020 sherald binding (detects+classifies+exits-nonzero, never performs the op); hermetic -race green fix so the CLI runs without a JWT secret
HRD-034	task	in_progress	middle	§9.3 sherald backup-snapshot <target> — hardlinked snapshot straggler: implemented in sherald/cmd/sherald/sysops_cmds.go refuses overwrite, classifies §9.3 SubjectBackup → .gate.recovery equality -race green
HRD-035	task	in_progress	middle	§11.4.2 bherald evidence capture <test_id> — capture Batch C: implemented as bherald §43 build/CI command (bherald/build_cmds.go) feeding the HRD-021 bherald binding; hermetic -race green
HRD-036	task	in_progress	high	§11.4.10 cherald creds scan — gitleaks/trufflehog integration, .credential.leak — Batch C: implemented as cherald §43 verification (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-021 cherald binding; hermetic -race green

ID	Type	Status	Criticality	Title
				detect-only; hermetic -race green (routed to §11.4.10 credential-leak; fix secret value printed)
HRD-037	task	in_progress	low	§11.4.12 cherald docs sync — regen Issues_Summary / Fixed_Status_Summary — Batch C: implemented as cherald §43 docs-pipeline cmd/cherald/docops_cmds.go feeding the HRD-019 cherald binding; detect-only; hermetic -race green; --apply to regenerate; ships the §107 lazy-verifier fix so the CLI runs hermetic -race green
HRD-038	task	in_progress	low	§11.4.18 cherald script-docs check — assert sibling .md for Batch C: implemented as cherald §43 verify/check command (cherald checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only (routed to §11.4.60 — §11.4.62 has no cherald rule)
HRD-039	task	in_progress	low	§11.4.19 / .23 cherald fixed align+cherald colorize .html HTML colorizer — Batch C: implemented as cherald §43 docs-pipeline cmd/cherald/docops_cmds.go feeding the HRD-019 cherald binding; detect-only; hermetic -race green; --apply to regenerate; ships the §107 lazy-verifier fix so the CLI runs hermetic -race green
HRD-040	task	in_progress	high	§11.4.26 sherald constitution pull — wrap fetch + rebase .bundle.updated — Batch C: implemented as sherald §43 command (sherald/sysops_cmds.go) feeding the HRD-020 sherald binding; (detects+classifies+exits-nonzero, never performs the op); hermetic -race green; fix so the CLI runs without a JWT secret
HRD-041	task	in_progress	middle	§11.4.27 bherald test-tier verify — 8-tier matrix verification implemented as bherald §43 build/CI command (bherald/cmd/bherald/build_cmds.go) feeding the HRD-021 bherald binding; hermetic -race green
HRD-042	task	in_progress	low	§11.4.31 cherald submanifest verify — Submodule-Dependency Batch C: implemented as cherald §43 verify/check command (cherald checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only
HRD-043	task	in_progress	high	§11.4.36 pherald install-upstreams — install_upstreams wrapper implemented as gitops command (§11.4.74 FindScript-resolved constitution HRD-023 binding; hermetic temp-repo tests -race green
HRD-044	task	in_progress	middle	§11.4.37 pherald fetch-guard — pre-edit fetch + rebase enforcement implemented as gitops command (§11.4.74 wrap of git binary); --emit-stdout hermetic temp-repo tests -race green
HRD-045	task	in_progress	high	§11.4.40 rherald gate retest — pre-tag full-suite retest gate -rherald §43 release command (rherald/cmd/rherald/release_cmds.go) feeding the HRD-022 rherald binding; reuses shared commons/gitops; hermetic -race green
HRD-046	task	in_progress	high	§11.4.41 sherald force-push gate — merge-first + per-session Batch C: implemented as sherald §43 command (sherald/cmd/sherald/sysops_cmds.go) feeding the HRD-020 sherald binding; PRE-FLIGHT (detects+classifies+exits-nonzero, never performs the op); hermetic -race green; fix so the CLI runs without a JWT secret
HRD-047	task	in_progress	middle	§11.4.45 / .56 scherald status-digest — periodic Status.md regen — Batch C straggler: implemented in scherald/cmd/scherald/status_cmds.go feeding the HRD-025 scherald binding (§11.4.45 status-sweep; detect-only; regenerates Status_Summary); hermetic -race green
HRD-048	task	in_progress	low	§11.4.53 cherald fixed-summary sync — standalone Fixed_Status_Summary Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only

ID	Type	Status	Criticality	Title
				regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-049	task	in_progress	middle	§11.4.55 pherald reopen <HRD-NNN> — Issues→Fixed reverse dependencies Batch C: implemented as gitops command (the Wave 6.5 inbound Fixer); detect-by-hermetic emit feeds HRD-023 binding; hermetic temp-repo tests -race green
HRD-050	task	in_progress	middle	§11.4.59 cherald readme sync — README doc-link regen + regenerate Batch C: implemented as cherald §43 docs-pipeline command (Cherald/docs/commands/docops_cmds.go) feeding the HRD-019 cherald binding; detect-by-hermetic regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-051	task	in_progress	high	§11.4.60 cherald composite-gate — canonical implementation of COMPOSITE-SYNC — Batch C: implemented as cherald §43 verify/verify-check command (Cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-052	task	in_progress	middle	§11.4.65 cherald export — bulk Markdown export wrapper (mdwrap) implemented as cherald §43 docs-pipeline command (Cherald/cmd/docs/commands/docops_cmds.go) feeding the HRD-019 cherald binding; detect-by-hermetic regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-053	task	in_progress	high	§11.4.71 pherald pre-push — fetch + investigate + integrate hooks as gitops command (§11.4.74 wrap of git binary); --emit feeds HRD-023 binding; hermetic temp-repo tests -race green
HRD-054	task	in_progress	middle	§11.4.73 cherald spec-version check — Revision-vs-edits check implemented as cherald §43 verify/check command (Cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-055	task	in_progress	middle	§11.4.74 cherald catalogue-check <pr> — scan PR for Catalogue runner over vasic-digital + HelixDevelopment — Batch C: implemented as cherald §43 verify/check command (Cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-056	task	in_progress	high	§12.6 sherald mem-budget watch — daemon-mode 60% threshold .host.safety_breach — Batch C: implemented as sherald §43 cmd/sherald/sysops_cmds.go feeding the HRD-020 sherald binding; detect-only; hermetic GATE (detects+classifies+exits-nonzero, never performs the op); hermetic temp-repo tests -race green regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-081	task	open	low	Extend digital.vasic.containers/pkg/compose to detect docker compose runtime and either emit runtime-appropriate flags (no flags for docker compose) or fall back to host-side healthcheck polling. Composes with docker compose .WithWait(true) works across both backends. Also fix podman-compose ps output (returns 0 services even when containers are running directly). Per §11.4.76: extend upstream submodule, never reimplement
HRD-085	task	in_progress	middle	Implement single-task admin operations on commons_infra.pgxTaskRepository: GetByID, Update, Delete. Required for Requeue + MoveToDead + BackgroundTask row by ID; full-row Update including JSONB column decision per §107.
HRD-086	task	in_progress	middle	Implement worker-side running-task state mutations on commons_infra.pgxTaskRepository — UpdateStatus, UpdateHeartbeat, SaveCheckpoint. Required by River worker reaper. Currently all four return ErrUnsupported (HRD-086). S

ID	Type	Status	Criticality	Title
				guarded by valid-state-machine check; progress as (float64, mes updated_at = now() writeback; checkpoint as opaque []byte task row.
HRD-087	task	in_progress	low	Implement admin / stats / audit reads on commons_infra.pgxFas GetByStatus, GetPendingTasks, CountByStatus, GetTas v1/queue/* introspection endpoints + Peek delegate. Currently all ErrUnsupported (HRD-087). Scope: status-filtered paginated r Peek; status-bucketed counts; per-task execution-history rows from the task_execution_history table.
HRD-088	task	in_progress	middle	Implement queue-recovery reads on commons_infra.pgxFas GetStaleTasks, GetByWorkerID. Drives the stuck-task reaper loop. Currently both return ErrUnsupported (HRD-088). Scope against updated_at; per-worker assignment lookup for re-dispatch
HRD-089	task	in_progress	low	Implement resource-monitor I/O on commons_infra.pgxFas SaveResourceSnapshot, GetResourceSnapshots. Persists samples for capacity-planning + post-mortem. Currently both return E (HRD-089). Scope: append-only insert keyed by (task_id, cap paginated read in reverse-chronological order. Schema target: a task table not yet in the §9.6 migration set — adding it is part of this HRD.
HRD-090	task	open	middle	Implement dead-letter handling on commons_infra.pgxFas MoveToDeadLetter. Required failure path when a task exhausts re invariant. Currently returns ErrUnsupported (HRD-090). Scope BackgroundTask row to a dead_letter_tasks table with the fail row JSONB snapshot; emit a .queue.dead_letter event via cor per §42.1. Schema target: a dead_letter_tasks table not yet in t adding it is part of this HRD.
HRD-115	task	in_progress	high	Wave 7 T6 — Slack channel adapter (Socket Mode): commons_mes slack/ implements channels.Channel — New/NewWithBase parsing slack://<bot-token>@<workspace>/<channel-id> Send(chat.postMessage), SendReply(thread_ts) + SendReplyGe w/ files.uploadV2 attachment fan-out), Subscribe (Socket Mode), E (auth.test → IdentityUserID, cached), DownloadAttachment (file inbox/slack/<sha>.<ext> via channels.WriteContentAddress Vendored submodules/slack-go @ v0.16.0 (commit 209ec09) commons_messaging/go.mod replace per Herald §11.4.74. 22 he incl. subtests) - race green; inheritance gate 15/0 post-.gitmodules-ec TestSlackSatisfiesChannel confirms interface satisfaction.
HRD-116	task	in_progress	middle	Wave 7 T7 — qaherald Slack MessengerClient + channel-keyed internal/messenger/{slack.go, builder.go}: raw-HT 11 MessengerClient methods (Me/Send/SendPhoto/SendDocume WaitForReply/Download/Preflight/GetChatMember/Close); GetUpda conversations.history+oldest=<ts> watermark (Slack ha MessageID = dotted-float ts string; channel-keyed Build(BuildC unknown→error). Token NEVER in errors — sanitizeError() c TestSlack_Send_ErrorDoesNotLeakToken pins it with a pl SUPERSECRET-must-not-leak-7777. 30 hermetic httptest test time pin var _ MessengerClient = (*SlackClient)(ni CLEANUP: ships files.upload V1 (deprecated by Slack 2025-Q — functionally equivalent for the httptest seam, swappable without AF slack.go header.

HRD-131	task	open	middle	V3 §11/§32.2/§43 + Wave 7 plan + adapter source paths + every HRD REGEN_ALL=1 bash scripts/export_docs.sh (new-guide) Migrate text HRD trackers to versioned SQLite single-source-of-truth (6-phase) — DB committed as authoritative SSoT per operator mandate (item): file the scope-locked tracking HRD. Phase 2: scaffold/adopt the already lives in the constitution submodule (constitution/scripts/items/) — Herald references it per §11.4.74 catalogue-first and new sync md→db (load docs/Issues.md / docs/Fixed.md / *_Summary.md / docs/CONTINUATION.md §3 into docs/.workable) sync db→md byte-identical (round-trip regeneration so MD↔DB drift impossible). Phase 5: generator shims (the *_Summary.md variants become derived from the DB). Phase 6: prohibit text-direct edits (release the only authoring surface). Operator divergence from the parent §11.4 regeneration default: for Herald the DB IS the authoritative artefact — docs/.workable_items.db is version-controlled (committed), but only the transient WAL/SHM sidecars (docs/.workable_items.db.gitignored ("We should not git ignore our workable items database since truth regarding items we have to do on the project!")). Scope-lock: this row) + Phase 2 adoption ONLY. Phases 3-6 (md→db sync, db→md sync, generator shims, text-direct-edit prohibition) are follow-on work-items completes, so the §106 spec-change / §107.x evidence invariants are n
