Per Universal §11.4.74 every new row carries a Catalogue-Check line in its References cell (one of reuse|extend|no-match <org/repo>@<sha>). For HRDs whose catalogue-check is still pending, the row records no-match (2026-05-20) — operators reviewing the implementation PR will re-verify.

ID	Type	Status	Criticality	Title
HRD-015	task	open	low	Inheritance gate I8 invariants for Go scaffold (go.work + commons/typ passes) cherald constitution bindings — cherald/internal/bindin cherald-owned §42.3 rules as concrete commons_constitution. through 5 event classes
HRD-019	task	in_progress	high	(.policy.violation/.gate.failed/.gate.recovered/. over the Batch-A emit+persist+audit foundation; POST /v1/compl

ID	Type	Status	Criticality	Title
				surface drives detect→emit→persist→audit, visible on the existing GE pull surface. Vertical-slice bespoke detectors landed (§11.4.29 naming, §11.4.44 doc-revision-header, §11.4.18 script-docs, §11.4.73 spec-drift) remaining 25 rules use the shared marker-check mechanism (verdict decided by catalogue command / sweep) with the full emit-routing framework in place; remaining bespoke detector is per-rule follow-up. sher ald host-safety + repo-safety constitution bindings — sher ald bindings Pipeline registers the 15 sher ald-owned §42.3 host/repo-safety bindings (§11.4.24/.26/.32/.36/.41/.47/.71, §12.1/.2/.3/.6) as concrete commons_ constitution. Evaluator impls routed through 6 S (. host . safety . breach / . repo . safety . breach / . gate . recovered) over the Batch-A emit+persist+audit foundation, mirroring the proven pattern. The 3 named DETECTION hooks landed as REAL pure class: detector (§9.1: rm/git-reset/clean without backup → . repo . safety . breach / . gate . recovered), force-push without merge-first OR session-interceptor (§11.4.41/§9.2: force-push without merge-first OR session-interceptor → . repo . safety . breach), mem-budget watcher (§12.6: reported usage → . host . safety . breach) — plus forbidden-host-op (§12.1) + pre-receive hook (remaining rows. CRITICAL §12-safety: every detector DETECTS+RECORDS string description; NONE performs the destructive op, force-pushes, session-interceptor, allocates memory (the mem-budget watcher reads a fabricated fraction of the session) §43 command bodies (HRD-033/046/056) supply the live op-interceptor). bher ald CI/test bindings — bher ald / internal / bindings Pipeline registers the 15 bher ald-owned §42.3 CI/test gate-result rules (§1, §1.1, §11.4.2/.3/.4/.5/.7/.9/.13/.14/.24/.27/.30/.39/.43/.46/.48–.52/.67) as concrete commons_ constitution. Evaluator impls routed through 3 event classes (. gate . failed / . gate . recovered via the build/test gate-result rules, . policy . violation + . repo . safety . breach for the shared row) over the Batch-A emit+persist+audit foundation, mirroring the proven Pipeline pattern. bher ald is the BUILD/CI flavor; it emits CI/test gate-result rules that integrate with the consuming project's CI workflow. 3 bespoke pure detectors landed: result classification (§1/§11.4.50 — PASS/FAIL/flaky from a recorded result → . gate . failed / . gate . recovered), test-tier-verify (§11.4.27/§42.3 — matrix; a missing tier FAILs), anti-bluff-PASS detection (§11.4.2/.5 — WITHOUT a captured-evidence artefact is a §11.4 PASS-bluff → FAIL). The shared marker-check mechanism (verdict decided upstream by the §43 command bodies) full emit-routing framework in place. rher ald release constitution bindings — rher ald / internal / bindings Pipeline registers the 4 rher ald-owned §42.3 release-lifecycle rules (§4 tag mirror, §5 multi-format export [shared with cherald], §11.4.38 installable-asset event, §11.4.39 retest before release tag) as concrete commons_ constitution. Evaluator impls routed through 2 event classes (. release . gate . blocked via the existing RELEASE flavor, ReleaseGateBlocked emitter surface for §4/§11.4.38/§11.4.40 + §11.4.39) over the Batch-A emit+persist+audit foundation, mirroring the proven HRD-019/020/021 pattern. The RELEASE flavor. 4 bespoke PURE detectors landed: tag-mirror-parent but missing on any owned mirror, with_tag<mirrors, → . release . gate . blocked), changelog-conformance (§5 — non-conformant changelog OR stale multi-format export → . policy . violation), stale multi-format export (§11.4.40 CRITICAL — tag attempted without a green all-8-§40.2-tier-1).

HRD-021	task	in_progress	middle	
HRD-022	task	in_progress	middle	

ID	Type	Status	Criticality	Title
				.release.gate.blocked), installable-asset-evidence (§11.4.38 - install check → .release.gate.blocked). CRITICAL §12-safe CLASSIFIES a recorded release-op outcome string; NONE tags, push downloads, or installs — the live release-op interception is scope-lock (HRD-031/032/045).
HRD-023	task	in_progress	middle	pherald project bindings (§2 commit+push, §3 submodule propagate §11.4.11/.15/.21/.22/.34/.37/.42/.55/.66/.71/.74) — Batch B: pherald bindings/ Pipeline + §42.3-owned rule set + 5 bespoke PURE detector discipline / submodule-propagation-order / pre-push-fetch-guard / fetch through the commons_constitution Evaluator+audit foundation; -race - Live op-interception deferred to §43 HRD-029/030/043/044/049/053.
HRD-024	task	in_progress	middle	iherald constitution-rule escalation bindings (§11.4.10/.10.A credential + §11.4.66 operator-blocked escalation) — Batch B: iherald/ internal/ Pipeline routing .credential.leak (forced-critical) + .policy detectors wired through commons_constitution Evaluator+audit; -race -no-real-secret attestation. Live paging deferred to §43 / HRD-024-paging
HRD-025	task	in_progress	low	scherald scheduled-audit bindings (§11.4.45 periodic Status.md sweep compliance digest) — Batch B: scherald/ internal/ bindings .policy.violation + 3 bespoke detectors (status-sweep / digest- through commons_constitution Evaluator+audit; -race -count=3 green scheduler deferred to §43 HRD-047.
HRD-029	task	in_progress	middle	§2 pherald commit-push — single-entripoint locked commit + C: implemented as gitops command (§11.4.74 wrap of git binary); --en hermetic temp-repo tests -race green
HRD-030	task	in_progress	middle	§3 pherald submodule propagate — owned-submodule wall Batch C: implemented as gitops command (§11.4.74 wrap of git binary binding; hermetic temp-repo tests -race green
HRD-031	task	in_progress	middle	§4 rherald tag mirror — assert tag exists on every owned sub implemented as rherald §43 release command (rherald/cmd/rherald release_cmds.go) feeding the HRD-022 rherald binding; reuses s hermetic -race green
HRD-032	task	in_progress	low	§5 rherald changelog generate — Conventional Commits - <v>.md + multi-format export — Batch C: implemented as rherald § (rherald/cmd/rherald/release_cmds.go) feeding the HR reuses shared commons/gitops; hermetic -race green
HRD-033	task	in_progress	high	§9.1 sherald destructive guard <op> — wrap rm/git-rese prerequisite checks — Batch C: implemented as sherald §43 command sherald/sysops_cmds.go) feeding the HRD-020 sherald binding (detects+classifies+exits-nonzero, never performs the op); hermetic -ra fix so the CLI runs without a JWT secret
HRD-034	task	in_progress	middle	§9.3 sherald backup-snapshot <target> — hardlinked sn straggler: implemented in sherald/cmd/sherald/sysops_cm refuses overwrite, classifies §9.3 SubjectBackup → .gate.recover equality -race green
HRD-035	task	in_progress	middle	§11.4.2 bherald evidence capture <test_id> — capture Batch C: implemented as bherald §43 build/CI command (bherald/ build_cmds.go) feeding the HRD-021 bherald binding; hermetic -
HRD-036	task	in_progress	high	§11.4.10 cherald creds scan — gitleaks/trufflehog integration, .credential.leak — Batch C: implemented as cherald §43 verif

ID	Type	Status	Criticality	Title
				(cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green (routed to §11.4.10 credential-leak; fix so the CLI runs without a JWT secret value printed)
HRD-037	task	in_progress	low	§11.4.12 cherald docs sync — regen Issues_Summary / Fixed_Status_Summary — Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green; --apply to regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-038	task	in_progress	low	§11.4.18 cherald script-docs check — assert sibling .md for Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green (routed to §11.4.60 — §11.4.62 has no cherald rule)
HRD-039	task	in_progress	low	§11.4.19 / .23 cherald fixed align+cherald colorize — HTML colorizer — Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green; --apply to regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-040	task	in_progress	high	§11.4.26 sherald constitution pull — wrap fetch + rebase .bundle.updated — Batch C: implemented as sherald §43 command (sherald/cmd/sherald/sysops_cmds.go) feeding the HRD-020 sherald binding; detect-only; hermetic -race green (detects+classifies+exits-nonzero, never performs the op); hermetic -race green; fix so the CLI runs without a JWT secret
HRD-041	task	in_progress	middle	§11.4.27 bherald test-tier verify — 8-tier matrix verification implemented as bherald §43 build/CI command (bherald/cmd/bherald/build_cmds.go) feeding the HRD-021 bherald binding; hermetic -race green
HRD-042	task	in_progress	low	§11.4.31 cherald submanifest verify — Submodule-Dependency Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-043	task	in_progress	high	§11.4.36 pherald install-upstreams — install_upstreams wrapper implemented as gitops command (§11.4.74 FindScript-resolved constants); Batch C: implemented as pherald §43 command (pherald/cmd/pherald/sysops_cmds.go) feeding the HRD-020 pherald binding; PRE-FLIGHT (detects+classifies+exits-nonzero, never performs the op); hermetic -race green; fix so the CLI runs without a JWT secret
HRD-044	task	in_progress	middle	§11.4.37 pherald fetch-guard — pre-edit fetch + rebase enforcement implemented as gitops command (§11.4.74 wrap of git binary); --emit-stdout; hermetic temp-repo tests -race green
HRD-045	task	in_progress	high	§11.4.40 rherald gate retest — pre-tag full-suite retest gate implemented as rherald §43 release command (rherald/cmd/rherald/release_cmds.go) feeding the HRD-022 rherald binding; reuses shared commons/gitops; hermetic -race green
HRD-046	task	in_progress	high	§11.4.41 sherald force-push gate — merge-first + per-session Batch C: implemented as sherald §43 command (sherald/cmd/sherald/sysops_cmds.go) feeding the HRD-020 sherald binding; PRE-FLIGHT (detects+classifies+exits-nonzero, never performs the op); hermetic -race green; fix so the CLI runs without a JWT secret
HRD-047	task	in_progress	middle	§11.4.45 / .56 scherald status-digest — periodic Status.md regen — Batch C straggler: implemented in scherald/cmd/scherald/status_cmds.go feeding the HRD-025 scherald binding (§11.4.45 status-sweep; detect-only; regenerates Status_Summary); hermetic -race green
HRD-048	task	in_progress	low	§11.4.53 cherald fixed-summary sync — standalone Fixed_Status_Summary Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green

ID	Type	Status	Criticality	Title
				regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret green
HRD-049	task	in_progress	middle	§11.4.55 pherald reopen <HRD-NNN> — Issues→Fixed reverse dependencies Batch C: implemented as gitops command (the Wave 6.5 inbound Fixer) --emit feeds HRD-023 binding; hermetic temp-repo tests -race green
HRD-050	task	in_progress	middle	§11.4.59 cherald readme sync — README doc-link regen + regenerate Batch C: implemented as cherald §43 docs-pipeline command (Cherald/cmd/cherald/docsops_cmds.go) feeding the HRD-019 cherald binding; detect-by regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret green
HRD-051	task	in_progress	high	§11.4.60 cherald composite-gate — canonical implementation COMPOSITE-SYNC — Batch C: implemented as cherald §43 verify/verify-check (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-052	task	in_progress	middle	§11.4.65 cherald export — bulk Markdown export wrapper (mdwrap) implemented as cherald §43 docs-pipeline command (Cherald/cmd/cherald/docsops_cmds.go) feeding the HRD-019 cherald binding; detect-by regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret green
HRD-053	task	in_progress	high	§11.4.71 pherald pre-push — fetch + investigate + integrate hooks Batch C: implemented as gitops command (§11.4.74 wrap of git binary); --emit feeds HRD-023 repo tests -race green
HRD-054	task	in_progress	middle	§11.4.73 cherald spec-version check — Revision-vs-edits check implemented as cherald §43 verify/check command (Cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-055	task	in_progress	middle	§11.4.74 cherald catalogue-check <pr> — scan PR for Catalogue runner over vasic-digital + HelixDevelopment — Batch C: implemented as cherald §43 check command (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-056	task	in_progress	high	§12.6 sherald mem-budget watch — daemon-mode 60% threshold .host.safety_breach — Batch C: implemented as sherald §43 cmd/sherald/sysops_cmds.go feeding the HRD-020 sherald binding; GATE (detects+classifies+exits-nonzero, never performs the op); hermetic regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-081	task	open	low	Extend digital.vasic.containers/pkg/compose to detect docker compose runtime and either emit runtime-appropriate flags (no docker compose) or fall back to host-side healthcheck polling. Composes with docker compose.WithWait(true) works across both backends. Also fix podman-compose ps output (returns 0 services even when containers are running directly). Per §11.4.76: extend upstream submodule, never reimplement
HRD-085	task	in_progress	middle	Implement single-task admin operations on commons_infra.pgxtaskrepository GetByID, Update, Delete. Required for Requeue + MoveToDead operator tooling. Currently all three return ErrUnsupported (HRD-085). BackgroundTask row by ID; full-row Update including JSONB column decision per §107.
HRD-086	task	in_progress	middle	Implement worker-side running-task state mutations on commons_infra.pgxtaskrepository — UpdateStatus, UpdateHeartbeat, SaveCheckpoint. Required by River worker reaper. Currently all four return ErrUnsupported (HRD-086). S

ID	Type	Status	Criticality	Title
				guarded by valid-state-machine check; progress as (float64, mes updated_at = now() writeback; checkpoint as opaque []byte task row.
HRD-087	task	in_progress	low	Implement admin / stats / audit reads on commons_infra.pgxFas GetByStatus, GetPendingTasks, CountByStatus, GetTas v1/queue/* introspection endpoints + Peek delegate. Currently all ErrUnsupported (HRD-087). Scope: status-filtered paginated r Peek; status-bucketed counts; per-task execution-history rows from the task_execution_history table.
HRD-088	task	in_progress	middle	Implement queue-recovery reads on commons_infra.pgxFas GetStaleTasks, GetByWorkerID. Drives the stuck-task reaper loop. Currently both return ErrUnsupported (HRD-088). Scope against updated_at; per-worker assignment lookup for re-dispatch
HRD-089	task	in_progress	low	Implement resource-monitor I/O on commons_infra.pgxFas SaveResourceSnapshot, GetResourceSnapshots. Persists samples for capacity-planning + post-mortem. Currently both return E (HRD-089). Scope: append-only insert keyed by (task_id, cap paginated read in reverse-chronological order. Schema target: a task table not yet in the §9.6 migration set — adding it is part of this HRD.
HRD-090	task	open	middle	Implement dead-letter handling on commons_infra.pgxFas MoveToDeadLetter. Required failure path when a task exhausts re invariant. Currently returns ErrUnsupported (HRD-090). Scope BackgroundTask row to a dead_letter_tasks table with the fail row JSONB snapshot; emit a .queue.dead_letter event via cor per §42.1. Schema target: a dead_letter_tasks table not yet in t adding it is part of this HRD.
HRD-115	task	in_progress	high	Wave 7 T6 — Slack channel adapter (Socket Mode): commons_mes slack/ implements channels.Channel — New/NewWithBase parsing slack://<bot-token>@<workspace>/<channel-id> Send(chat.postMessage), SendReply(thread_ts) + SendReplyGe w/ files.uploadV2 attachment fan-out), Subscribe (Socket Mode), E (auth.test → IdentityUserID, cached), DownloadAttachment (file inbox/slack/<sha>.<ext> via channels.WriteContentAddress Vendored submodules/slack-go @ v0.16.0 (commit 209ec09) commons_messaging/go.mod replace per Herald §11.4.74. 22 he incl. subtests) - race green; inheritance gate 15/0 post-.gitmodules-ec TestSlackSatisfiesChannel confirms interface satisfaction.
HRD-116	task	in_progress	middle	Wave 7 T7 — qaherald Slack MessengerClient + channel-keyed internal/messenger/{slack.go, builder.go}: raw-HT 11 MessengerClient methods (Me/Send/SendPhoto/SendDocume WaitForReply/Download/Preflight/GetChatMember/Close); GetUpda conversations.history+oldest=<ts> watermark (Slack ha MessageID = dotted-float ts string; channel-keyed Build(BuildC unknown→error). Token NEVER in errors — sanitizeError() c TestSlack_Send_ErrorDoesNotLeakToken pins it with a pl SUPERSECRET-must-not-leak-7777. 30 hermetic httptest test time pin var _ MessengerClient = (*SlackClient)(ni CLEANUP: ships files.upload V1 (deprecated by Slack 2025-Q — functionally equivalent for the httptest seam, swappable without AF slack.go header.

ID	Type	Status	Criticality	Title
HRD-117	task	in_progress	low	Wave 7 T8 — spec V3 r12→r13: §11.0 channels.Channel inbound §32.2 Telegram/Slack marked LIVE + §43 multi-channel pherald + the Wave 7 framework + Slack adapter (T6) + qaherald Slack client (T6) catches up to shipped code (no new product code in T8).
HRD-118	task	in_progress	high	Wave 7 T9 — e2e_bluff_hunt.sh E124-E131 multi-channel invariants: resolution, E125 tgram self-filter post-Wave-7 (pure-refactor invariant (interface satisfied + auth.test + chat.postMessage wire bytes + registry) Slack (env-gated HERALD_SLACK_BOT_TOKEN+HERALD_SLACK_CHANNEL_ID+triple-guard to prevent silent "no tests to run" PASS-bluff), E128 per-c E129 generalized IsSelfEcho (Username+UserID+empty-self), E130 n wiring, E131 qaherald messenger.Build dispatch. sc_anchor on the T6
HRD-131	task	open	middle	Migrate text HRD trackers to versioned SQLite single-source-of-truth (6-phase) — DB committed as authoritative SSoT per operator mandate (item): file the scope-locked tracking HRD. Phase 2: scaffold/adopt the already lives in the constitution submodule (constitution/scripts/items/) — Herald references it per §11.4.74 catalogue-first and never sync md→db (load docs/Issues.md / docs/Fixed.md / *_Summary.md / docs/CONTINUATION.md §3 into docs/.workable_items) sync db→md byte-identical (round-trip regeneration so MD↔DB drift impossible). Phase 5: generator shims (the *_Summary.md variants become derived from the DB). Phase 6: prohibit text-direct edits (release the only authoring surface). Operator divergence from the parent §11.4 regeneration default: for Herald the DB IS the authoritative artefact — docs/.workable_items.db is version-controlled (committed), but only the transient WAL/SHM sidecars (docs/.workable_items.db) are gitignored ("We should not git ignore our workable items database since truth regarding items we have to do on the project!"). Scope-lock: this row) + Phase 2 adoption ONLY. Phases 3-6 (md→db sync, db→md sync, generator shims, text-direct-edit prohibition) are follow-on work-items completes, so the §106 spec-change / §107.x evidence invariants are n
