## Herald — Status Summary

| Field          | Value                                                                                           |
|----------------|-------------------------------------------------------------------------------------------------|
| Revision       | 1                                                                                               |
| Created        | 2026-05-20                                                                                      |
| Last modified  | 2026-05-20                                                                                      |
| Status         | active                                                                                          |
| Status summary | Auto-summary companion to <code>Status.md</code> (per Universal §11.4.56). Two-audience format. |
| Issues         | HRD-007 (closing this commit)                                                                   |
| Issues summary | see <code>Issues_Summary.md</code>                                                              |
| Fixed          | 6 closed retrospectively                                                                        |
| Fixed summary  | see <code>Fixed_Summary.md</code>                                                               |
| Continuation   | regenerated whenever <code>Status.md</code> changes.                                            |

## Table of contents

- [For operators \(TL;DR\)](#)
- [For AI agents \(machine-readable\)](#)

## For operators (TL;DR)

Herald is **pre-implementation**. Spec set is V1 → V2 (archived) → V3 (active, ~3900 lines, comprehensive). Tracking docs (this one + `Issues.md` + `Fixed.md` + `CONTINUATION.md`) established 2026-05-20. Inheritance gate 12 PASS / 0 FAIL. **Next milestone:** first-implementation cycle — scaffold commons + commons\_messaging + pherald shim + verify §26.5 quickstart compose works end-to-end. Risk surface: Claude Code session assumption (V3 §33.2) needs real-world validation in the first scaffold cycle.
