Last modified	2026-05-28
Status	active
Status summary	r28 (v0.6.0 Wave 7 T10 — paired §1.1 mutation gate) marks HRD-119 Open→in_progress. <code>tests/test_wave7_mutation_meta.sh</code> ships 3 paired hermetic mutations against the Wave 7 multi-channel framework — M1 blank <code>IsSelfEcho</code> (echo-loop hazard), M2 drop slack channels. <code>Register in init()</code> (registry-resolution broken), M3 drop slack <code>thread_ts</code> append (reply threading degrades) — each mutated build observed FAIL on the matching <code>e2e</code> detector + restored byte-for-byte + post-restore PASS. New <code>TestSlackRegisteredViaInit</code> detector added to <code>slack_test.go</code> (it asserts <code>channels.Names()</code> contains "slack" — the only test that would FAIL under M2 specifically; without it M2 would silently "no tests to run" PASS-bluff). Gate run = 4 PASS / 0 FAIL (3 mutations + 1 quiescence assertion, no MUTATED W7 - residue in 3 production target files post-restore). Reuses Wave 6 canonical lockfile + trap + <code>assert_restored</code> + pre-flight guard verbatim. FOREGROUND-ONLY (§107.y / <code>feedback_no_concurrent_mutation_gates</code> operator mandate). Prior r27 (v0.6.0 Wave 7 T9 — e2e multi-channel invariants) marked HRD-118 Open→in_progress. <code>scripts/e2e_bluff_hunt.sh</code> gains E124-E131 (8 invariants anchored to live test names already shipped in HRD-110..117): E124 channels registry (resolve + unknown-errors), E125 tgram self-filter post-Wave-7 generalization (<code>TestSubscribeBotSelfFilter</code>), E126 slack adapter (<code>TestSlackSatisfiesChannel</code> + <code>auth.test</code> + <code>chat.postMessage</code> + registry wiring + <code>sc_anchor</code> to T6 docs/qa), E127 LIVE Slack triple-guarded (<code>HERALD_SLACK_BOT_TOKEN</code> + <code>HERALD_SLACK_CHANNEL_ID</code> + <code>grep TestSlack_Live_Send</code> — the third guard prevents the §107 "no tests to run = exit 0 = PASS-bluff" gotcha when <code>env</code> is set but no live-test exists), E128 per-channel inbox isolation + content-addressed idempotency, E129 generalized <code>IsSelfEcho</code> (<code>Username</code> + <code>UserID</code> + empty-self echo-loop hazard), E130 multi-channel pherald listen wiring (<code>TestListenWiresHandlerAndExitsOnCancel</code>), E131 qaherald messenger.<code>Build</code> dispatch (tgram + slack + unknown-errors-loud + <code>sc_anchor</code> to T7 docs/qa). Prior r26 (v0.6.0 Wave 7 T8 — spec V3 r12→r13) marked HRD-117

Field	Value
	Open→in_progress. Spec edits document the already-shipped Wave 7 framework + Slack: §11.0 gains the inbound-runtime extension note (commons_messaging/channels.Channel embeds commons.Channel + SendReplyGeneric + BotSelfIdentity + DownloadAttachment + init()-registered registry + generalized IsSelfEcho via `SelfIdentity{Kind: IdentityUsername

Per Universal §11.4.74 every new row carries a Catalogue-Check line in its References cell (one of reuse|extend|no-match <org/repo>@<sha>). For HRDs whose catalogue-check is still pending, the row records no-match (2026-05-20) — operators reviewing the implementation PR will re-verify.

ID	Type	Status	Criticality	Title
HRD-015	task	open	low	Inheritance gate I8 invariants for Go scaffold (go.work + commons/typ passes) cherald constitution bindings — cherald/internal/bindings cherald-owned §42.3 rules as concrete commons_constitution. through 5 event classes (.policy.violation/.gate.failed/.gate.recovered/. over the Batch-A emit+persist+audit foundation; POST /v1/compl surface drives detect→emit→persist→audit, visible on the existing GE pull surface. Vertical-slice bespoke detectors landed (§11.4.29 naming §11.4.44 doc-revision-header, §11.4.18 script-docs, §11.4.73 spec-drift remaining 25 rules use the shared marker-check mechanism (verdict d catalogue command / sweep) with the full emit-routing framework in p remaining bespoke detector is per-rule follow-up.
HRD-019	task	in_progress	high	sherald host-safety + repo-safety constitution bindings — sherald bindings Pipeline registers the 15 sherald-owned §42.3 host/repo-sa §11.4.24/.26/.32/.36/.41/.47/.71, §12.1/.2/.3/.6) as concrete commons_constitution.Evaluator impls routed through 6 S (.host.safety.breach/.repo.safety.breach/.gate.re over the Batch-A emit+persist+audit foundation, mirroring the proven pattern. The 3 named DETECTION hooks landed as REAL pure class detector (§9.1: rm/git-reset/clean without backup → .repo.safety interceptor (§11.4.41/§9.2: force-push without merge-first OR session- .repo.safety.breach), mem-budget watcher (§12.6: reported u .host.safety.breach) — plus forbidden-host-op (§12.1) + prer remaining rows. CRITICAL §12-safety: every detector DETECTS+RE string description; NONE performs the destructive op, force-pushes, s allocates memory (the mem-budget watcher reads a fabricated fraction §43 command bodies (HRD-033/046/056) supply the live op-intercept
HRD-020	task	in_progress	high	bherald CI/test bindings — bherald/internal/bindings P bherald-owned §42.3 CI/test gate-result rules (§1, §1.1, §11.4.2/.3/.4/.5/.7/.9/.13/.14/.24/.27/.30/.39/.43/.46/.48–.52/.67) as con commons_constitution.Evaluator impls routed through 3 e (.gate.failed/.gate.recovered via the build/test gate-result .policy.violation+ .repo.safety.breach for the shared row) over the Batch-A emit+persist+audit foundation, mirroring the pr Pipeline pattern. bherald is the BUILD/CI flavor; it emits CI/test gate- that integrate with the consuming project's CI workflow. 3 bespoke pu result classification (§1/§11.4.50 — PASS/FAIL/flaky from a recorded .gate.failed/.gate.recovered), test-tier-verify (§11.4.27/§4 matrix; a missing tier FAILs), anti-bluff-PASS detection (§11.4.2/.5 — WITHOUT a captured-evidence artefact is a §11.4 PASS-bluff → FAI
HRD-021	task	in_progress	middle	

ID	Type	Status	Criticality	Title
				shared marker-check mechanism (verdict decided upstream by the §43 full emit-routing framework in place.
HRD-022	task	in_progress	middle	rherald release constitution bindings — rherald/internal/b registers the 4 rherald-owned §42.3 release-lifecycle rules (§4 tag mirror multi-format export [shared with cherald], §11.4.38 installable-asset evidence retest before release tag) as concrete commons_constitution.Evaluator through 2 event classes (.release.gate.blocked via the existing ReleaseGateBlocked emitter surface for §4/§11.4.38/§11.4.40 + §11.4.40 for the shared §5 changelog row; a release recovery maps to the shared recovery companion since the release class family has no distinct "recovered" ledger emit+persist+audit foundation, mirroring the proven HRD-019/020/021 the RELEASE flavor. 4 bespoke PURE detectors landed: tag-mirror-parent but missing on any owned mirror, with_tag<mirrors, → .release.gate.blocked), changelog-conformance (§5 — non-herald changelog OR stale multi-format export → .policy.violation). (§11.4.40 CRITICAL — tag attempted without a green all-8-§40.2-tier .release.gate.blocked), installable-asset-evidence (§11.4.38 -install check → .release.gate.blocked). CRITICAL §12-safe CLASSIFIES a recorded release-op outcome string; NONE tags, push/downloads, or installs — the live release-op interception is scope-locked (HRD-031/032/045). pherald project bindings (§2 commit+push, §3 submodule propagation §11.4.11/.15/.21/.22/.34/.37/.42/.55/.66/.71/.74) — Batch B: pherald bindings/ Pipeline + §42.3-owned rule set + 5 bespoke PURE detector discipline / submodule-propagation-order / pre-push-fetch-guard / fetch through the commons_constitution Evaluator+audit foundation; -race -Live op-interception deferred to §43 HRD-029/030/043/044/049/053.
HRD-023	task	in_progress	middle	iherald constitution-rule escalation bindings (§11.4.10/.10.A credential + §11.4.66 operator-blocked escalation) — Batch B: iherald/internal/Pipeline routing .credential.leak (forced-critical) + .policy.violation detectors wired through commons_constitution Evaluator+audit; -race -no-real-secret attestation. Live paging deferred to §43 / HRD-024-paging
HRD-024	task	in_progress	middle	scherald scheduled-audit bindings (§11.4.45 periodic Status.md sweep compliance digest) — Batch B: scherald/internal/bindings .policy.violation + 3 bespoke detectors (status-sweep / digest-through commons_constitution Evaluator+audit; -race -count=3 green, scheduler deferred to §43 HRD-047.
HRD-025	task	in_progress	low	§2 pherald commit-push — single-entripoint locked commit + Batch C: implemented as gitops command (§11.4.74 wrap of git binary); --hermetic temp-repo tests -race green
HRD-029	task	in_progress	middle	§3 pherald submodule propagate — owned-submodule wall Batch C: implemented as gitops command (§11.4.74 wrap of git binary) binding; hermetic temp-repo tests -race green
HRD-030	task	in_progress	middle	§4 rherald tag mirror — assert tag exists on every owned sub implemented as rherald §43 release command (rherald/cmd/rherald_release_cmds.go) feeding the HRD-022 rherald binding; reuses s hermetic -race green
HRD-031	task	in_progress	middle	§5 rherald changelog generate — Conventional Commits -<v>.md + multi-format export — Batch C: implemented as rherald §
HRD-032	task	in_progress	low	

ID	Type	Status	Criticality	Title
				(rherald/cmd/rherald/release_cmds.go) feeding the HRD-020 sberald binding; hermetic -race green
HRD-033	task	in_progress	high	§9.1 sberald destructive guard <op> — wrap rm/git-resolve prerequisite checks — Batch C: implemented as sberald §43 command sberald/sysops_cmds.go feeding the HRD-020 sberald binding; hermetic -race green (detects+classifies+exits-nonzero, never performs the op); hermetic -race green fix so the CLI runs without a JWT secret
HRD-034	task	in_progress	middle	§9.3 sberald backup-snapshot <target> — hardlinked snapshot straggler: implemented in sberald/cmd/sberald/sysops_cmds.go; hermetic -race green refuses overwrite, classifies §9.3 SubjectBackup → .gate.recover; hermetic -race green equality -race green
HRD-035	task	in_progress	middle	§11.4.2 bherald evidence capture <test_id> — capture evidence Batch C: implemented as bherald §43 build/CI command (bherald/cmd/build_cmds.go) feeding the HRD-021 bherald binding; hermetic -race green
HRD-036	task	in_progress	high	§11.4.10 cherald creds scan — gitleaks/trufflehog integration, .credential.leak — Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green (routed to §11.4.10 credential-leak; fix so the CLI runs without a JWT secret value printed)
HRD-037	task	in_progress	low	§11.4.12 cherald docs sync — regen Issues_Summary / Fixed_Issues_Summary — Batch C: implemented as cherald §43 docs-pipeline command (cherald/docops_cmds.go) feeding the HRD-019 cherald binding; hermetic -race green -- apply to regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-038	task	in_progress	low	§11.4.18 cherald script-docs check — assert sibling .md for script docs Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green (routed to §11.4.60 — §11.4.62 has no cherald rule)
HRD-039	task	in_progress	low	§11.4.19/.23 cherald fixed align+cherald colorize — HTML colorizer — Batch C: implemented as cherald §43 docs-pipeline command (cherald/docops_cmds.go) feeding the HRD-019 cherald binding; hermetic -race green -- apply to regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-040	task	in_progress	high	§11.4.26 sberald constitution pull — wrap fetch + rebase .bundle.updated — Batch C: implemented as sberald §43 command sberald/sysops_cmds.go feeding the HRD-020 sberald binding; hermetic -race green (detects+classifies+exits-nonzero, never performs the op); hermetic -race green fix so the CLI runs without a JWT secret
HRD-041	task	in_progress	middle	§11.4.27 bherald test-tier verify — 8-tier matrix verification Batch C: implemented as bherald §43 build/CI command (bherald/cmd/bherald/build_cmds.go) feeding the HRD-021 bherald binding; hermetic -race green
HRD-042	task	in_progress	low	§11.4.31 cherald submanifest verify — Submodule-Dependency verification Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-043	task	in_progress	high	§11.4.36 pherald install-upstreams — install_upstreams wrapper Batch C: implemented as gitops command (§11.4.74 FindScript-resolved constitution) feeding the HRD-023 binding; hermetic temp-repo tests -race green
HRD-044	task	in_progress	middle	

ID	Type	Status	Criticality	Title
				§11.4.37 pherald fetch-guard — pre-edit fetch + rebase enforced; implemented as gitops command (§11.4.74 wrap of git binary); --emit feeds HRD-022 rherald binding; hermetic temp-repo tests -race green
HRD-045	task	in_progress	high	§11.4.40 rherald gate retest — pre-tag full-suite retest gate; rherald §43 release command (rherald/cmd/rherald/release.go) feeding the HRD-022 rherald binding; reuses shared commons/gitops; hermetic -race green
HRD-046	task	in_progress	high	§11.4.41 sherald force-push gate — merge-first + per-session Batch C: implemented as sherald §43 command (sherald/cmd/sherald/cmds.go) feeding the HRD-020 sherald binding; PRE-FLIGHT (detects+classifies+exits-nonzero, never performs the op); hermetic -race green; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-047	task	in_progress	middle	§11.4.45 / .56 scherald status-digest — periodic Status.md regen — Batch C straggler: implemented in scherald/cmd/scherald/cmds.go feeding the HRD-025 scherald binding (§11.4.45 status-sweep; detect-by-regenerates Status_Summary); hermetic -race green
HRD-048	task	in_progress	low	§11.4.53 cherald fixed-summary sync — standalone Fixed_Summary Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret; green
HRD-049	task	in_progress	middle	§11.4.55 pherald reopen <HRD-NNN> — Issues→Fixed reverses Batch C: implemented as gitops command (the Wave 6.5 inbound Fixed_Summary); --emit feeds HRD-023 binding; hermetic temp-repo tests -race green
HRD-050	task	in_progress	middle	§11.4.59 cherald readme sync — README doc-link regen + n Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret; green
HRD-051	task	in_progress	high	§11.4.60 cherald composite-gate — canonical implementation COMPOSITE-SYNC — Batch C: implemented as cherald §43 verify/check (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-052	task	in_progress	middle	§11.4.65 cherald export — bulk Markdown export wrapper (md) Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret; green
HRD-053	task	in_progress	high	§11.4.71 pherald pre-push — fetch + investigate + integrate hooks as gitops command (§11.4.74 wrap of git binary); --emit feeds HRD-020 sherald binding; hermetic temp-repo tests -race green
HRD-054	task	in_progress	middle	§11.4.73 cherald spec-version check — Revision-vs-edits Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-055	task	in_progress	middle	§11.4.74 cherald catalogue-check <pr> — scan PR for Catalogue runner over vasic-digital + HelixDevelopment — Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-056	task	in_progress	high	§12.6 sherald mem-budget watch — daemon-mode 60% threshold .host.safety_breach — Batch C: implemented as sherald §43 docs-pipeline command (sherald/cmd/sherald/cmds.go) feeding the HRD-020 sherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret; green

ID	Type	Status	Criticality	Title
				cmd/sherald/sysops_cmds.go) feeding the HRD-020 sherald GATE (detects+classifies+exits-nonzero, never performs the op); hermes verifier fix so the CLI runs without a JWT secret
HRD-081	task	open	low	Extend digital.vasic.containers/pkg/compose to detect docker compose runtime and either emit runtime-appropriate flags (no compose) or fall back to host-side healthcheck polling. Composes with compose.WithWait(true) works across both backends. Also fix podman-compose ps output (returns 0 services even when containers are directly). Per §11.4.76: extend upstream submodule, never reimplement
HRD-085	task	in_progress	middle	Implement single-task admin operations on commons_infra.pgxTaskRepository: GetByID, Update, Delete. Required for Requeue + MoveToDeadLetter operator tooling. Currently all three return ErrUnsupported (HRD-085). BackgroundTask row by ID; full-row Update including JSONB column decision per §107.
HRD-086	task	in_progress	middle	Implement worker-side running-task state mutations on commons_infra.pgxTaskRepository — UpdateStatus, UpdateHeartbeat, SaveCheckpoint. Required by River worker reaper. Currently all four return ErrUnsupported (HRD-086). Scope: guarded by valid-state-machine check; progress as (float64, message) updated_at = now() writeback; checkpoint as opaque []byte task row.
HRD-087	task	in_progress	low	Implement admin / stats / audit reads on commons_infra.pgxTaskRepository: GetByStatus, GetPendingTasks, CountByStatus, GetTasks v1/queue/* introspection endpoints + Peek delegate. Currently all return ErrUnsupported (HRD-087). Scope: status-filtered paginated read; Peek; status-bucketed counts; per-task execution-history rows from the task_execution_history table.
HRD-088	task	in_progress	middle	Implement queue-recovery reads on commons_infra.pgxTaskRepository: GetStaleTasks, GetByWorkerID. Drives the stuck-task reaper loop. Currently both return ErrUnsupported (HRD-088). Scope: against updated_at; per-worker assignment lookup for re-dispatch
HRD-089	task	in_progress	low	Implement resource-monitor I/O on commons_infra.pgxTaskRepository: SaveResourceSnapshot, GetResourceSnapshots. Persists samples for capacity-planning + post-mortem. Currently both return ErrUnsupported (HRD-089). Scope: append-only insert keyed by (task_id, capacity) paginated read in reverse-chronological order. Schema target: a task_resource table not yet in the §9.6 migration set — adding it is part of this HRD.
HRD-090	task	open	middle	Implement dead-letter handling on commons_infra.pgxTaskRepository: MoveToDeadLetter. Required failure path when a task exhausts retries invariant. Currently returns ErrUnsupported (HRD-090). Scope: BackgroundTask row to a dead_letter_tasks table with the failure row JSONB snapshot; emit a .queue.dead_letter event via commons_infra per §42.1. Schema target: a dead_letter_tasks table not yet in the migration set adding it is part of this HRD.
HRD-115	task	in_progress	high	Wave 7 T6 — Slack channel adapter (Socket Mode): commons_mes/slack/ implements channels.Channel — New/NewWithBaseChannel parsing slack://<bot-token>@<workspace>/<channel-id> Send (chat.postMessage), SendReply(thread_ts) + SendReplyGet(thread_ts) w/ files.uploadV2 attachment fan-out), Subscribe (Socket Mode), Unsubscribe (auth.test → IdentityUserID, cached), DownloadAttachment (file

ID	Type	Status	Criticality	Title
HRD-116	task	in_progress	middle	inbox/slack/<sha>.<ext> via channels.WriteContentAddress Vendored submodules/slack-go @ v0.16.0 (commit 209ec09) commons_messaging/go.mod replace per Herald §11.4.74. 22 h incl. subtests) - race green; inheritance gate 15/0 post-gitmodules-ec TestSlackSatisfiesChannel confirms interface satisfaction. Wave 7 T7 — qaherald Slack MessengerClient + channel-keyed internal/messenger/{slack.go,builder.go}: raw-HT 11 MessengerClient methods (Me/Send/SendPhoto/SendDocume WaitForReply/Download/Preflight/GetChatMember/Close); GetUpda conversations.history+oldest=<ts> watermark (Slack ha MessageID = dotted-float ts string; channel-keyed Build (BuildC unknown→error). Token NEVER in errors — sanitizeError() c TestSlack_Send_ErrorDoesNotLeakToken pins it with a pl SUPERSECRET-must-not-leak-7777. 30 hermetic httptest test time pin var _ MessengerClient = (*SlackClient)(ni CLEANUP: ships files.upload V1 (deprecated by Slack 2025-Q — functionally equivalent for the httptest seam, swappable without AF slack.go header.
HRD-117	task	in_progress	low	Wave 7 T8 — spec V3 r12→r13: §11.0 channels.Channel inbound §32.2 Telegram/Slack marked LIVE + §43 multi-channel pherald the Wave 7 framework + Slack adapter (T6) + qaherald Slack client (T catches up to shipped code (no new product code in T8). Wave 7 T9 — e2e_bluff_hunt.sh E124-E131 multi-channel invariants: resolution, E125 tgram self-filter post-Wave-7 (pure-refactor invariant (interface satisfied + auth.test + chat.postMessage wire bytes + registry Slack (env-gated HERALD_SLACK_BOT_TOKEN+HERALD_SLACK_CHANNEL_ID+ triple-guard to prevent silent "no tests to run" PASS-bluff), E128 per-c E129 generalized IsSelfEcho (Username+UserID+empty-self), E130 n wiring, E131 qaherald messenger.Build dispatch. sc_anchor on the T6
HRD-118	task	in_progress	high	Wave 7 T10 — paired §1.1 mutation gate tests/test_wave7_mu PASS / 0 FAIL): M1 blank IsSelfEcho → TestIsSelfEchoUs hazard caught) → restored → PASS; M2 drop slack channels.Reg TestSlackRegisteredViaInit FAILs → restored → PASS; M append in send.go → TestSlackSendReplyUsesThreadTS + quiescence assertion (no MUTATED W7 - residue in 3 production ta Reuses Wave 6 canonical .git/MUTATION_IN_PROGRESS lockfil flight dirty-tree-and-residue guard + byte-for-byte assert_restor ONLY (§107.y / no-concurrent-mutation operator mandate).
HRD-119	task	in_progress	high	Migrate text HRD trackers to versioned SQLite single-source-of-truth 6-phase) — DB committed as authoritative SSoT per operator mandate item): file the scope-locked tracking HRD. Phase 2: scaffold/adopt the already lives in the constitution submodule (constitution/scrip items/) — Herald references it per §11.4.74 catalogue-first and neve
HRD-131	task	open	middle	sync md→db (load docs/Issues.md / docs/Fixed.md / *_Su Status.md / docs/CONTINUATION.md §3 into docs/.worka sync db→md byte-identical (round-trip regeneration so MD[?]DB drift impossible). Phase 5: generator shims (the *_Summary.md variants become derived from the DB). Phase 6: prohibit text-direct edits (relea the only authoring surface). Operator divergence from the parent §11.4

ID	Type	Status	Criticality	Title
				regeneration default: for Herald the DB IS the authoritative artefact — docs/.workable_items.db is version-controlled (committed), only the transient WAL/SHM sidecars (docs/.workable_items.gitignored ("We should not git ignore our workable items database since truth regarding items we have to do on the project!")). Scope-lock: this row) + Phase 2 adoption ONLY. Phases 3-6 (md→db sync, db→md generator shims, text-direct-edit prohibition) are follow-on work-items completes, so the §106 spec-change / §107.x evidence invariants are n
