

Herald

Herald — Issues Summary

Field	Value
Revision	1
Created	2026-05-20
Last modified	2026-05-20
Status	active
Status summary	Auto-summary companion to <code>Issues.md</code> (per Universal §11.4.12 — paired tracker). Two-audience format (operator + AI agent) per Universal §11.4.56.
Issues	1 open / in-progress (see below)
Issues summary	HRD-007 V3 r3 cross-doc sync — closing in the same commit.
Fixed	n/a (see <code>Fixed_Summary.md</code>)
Fixed summary	—
Continuation	regenerated whenever <code>Issues.md</code> changes; manual until the auto-sync wrapper exists

Table of contents

- [For operators \(TL;DR\)](#)
- [For AI agents \(machine-readable\)](#)

For operators (TL;DR)

Herald is pre-implementation. The only currently-tracked work is the V3 r3 cross-doc sync (HRD-007) which is being closed in the same commit that introduces this file. No engineering work blocked; no incidents in flight. Next milestone: first-implementation cycle (scaffold commons + commons_messaging + pherald shim against the §11.0 type contract).

For AI agents (machine-readable)
