

Herald — Continuation

Herald — Continuation

Field	Value
Revision	1
Created	2026-05-20
Last modified	2026-05-20
Status	active
Status summary	Sacred handoff doc per Universal §12.10. Carries the verbatim resumption prompt + concrete next steps so any agent can resume work without conversational context.
Issues	HRD-007 (closing this commit)
Issues summary	see Issues_Summary.md
Fixed	HRD-001..HRD-006
Fixed summary	see Fixed_Summary.md
Continuation	This file IS the continuation pointer. Update on every non-trivial commit (per Universal §12.10).

§0. How to use this document

Paste the following block into any CLI agent (Claude Code, OpenCode, Cursor, Aider, Gemini CLI) to resume Herald work exactly where it was left:

You are working on the Herald project at ~/Projects/Herald (also reachable as the Herald/ submodule of a consuming project). The Helix Universal Constitution lives at <ancestor>/constitution/ (parent-walk discovery). Read in this order: CLAUDE.md, AGENTS.md, README.md, docs/guides/HERALD_CONSTITUTION.md, docs/guides/CONSTITUTION_INHERITANCE.md, docs/specs/mvp/specification.V3.md. Then read docs/CONTINUATION.md (this file) for live state, docs/Issues.md for open work, docs/Status.md for current phase, docs/Fixed.md for closed history. The inheritance gate tests/test_constitution_inheritance.sh MUST exit 0 before any commit. Multi-mirror fan-out push to all four hosts (GitHub + GitLab + GitFlic + GitVerse) is mandatory on every commit per Constitution §103.

§1. Snapshot

- **Active spec:** docs/specs/mvp/specification.V3.md (Revision 3, ~3900 lines, Status=active).
- **Archived specs:** docs/specs/mvp/archive/specification.V1.md, .../specification.V2.md (frozen).
- **Tracking docs:** Issues.md, Issues_Summary.md, Fixed.md, Fixed_Summary.md, Status.md, Status_Summary.md, CONTINUATION.md (this file) — all established this commit.
- **Inheritance gate:** 12 PASS / 0 FAIL. Meta-test ✓.
- **Phase:** pre-implementation. No go.mod, no Go source, no container compose stack yet.
- **Branch:** main only. Fan-out push to 4 mirrors is proven.

§2. Last commit landed

(This commit, when merged) — V3 r3 final polish: cross-doc sync (parent docs point at specification.V3.md); tracking docs scaffold (Issues.md/Fixed.md/Status.md/CONTINUATION.md + summaries); §30.8 review log added; full re-export of V3 + 4 parent docs to .html + .pdf. Inheritance gate 12 PASS / 0 FAIL throughout.

Prior commit: V3 r2 at f8b8073 — refined all nine flavors for richer channel interaction; V2 archived; ToC duplicates cleaned.

§3. Active work

ID	Status	What
HRD-007	in_progress → resolving in this commit	V3 r3 cross-doc sync + tracking-docs scaffold

No other items in flight.

§4. Next concrete steps

1. **Validate the V3 §26.5 quickstart compose** on a fresh laptop. Confirm Postgres + Redis + OTel collector + pherald boot cleanly, that curl posts a CloudEvent to /v1/events, that a Telegram delivery lands, and the diary appends. **Open HRD-008 for this validation work.**
2. **Scaffold commons and commons_messaging** against the §11.0 type contract. Goal: empty implementations of Channel, OutboundMessage, Receipt, InboundEvent, Branding, ChannelID, Subscriber — plus the null:// adapter (§11.14) for tests. **Open HRD-009.**
3. **Implement the Postgres + River queue layer** per §5.3 + §16. RLS policy template + per-tenant key prefixing in Redis. Migrations under commons_storage/migrations/000NNN_*.sql per §9.6. **Open HRD-010.**
4. **First channel adapter** — Telegram per §11.1. Bot API client behind Channel interface; webhook ingress with §5.5 signature verification. **Open HRD-011.**
5. **Claude Code dispatcher** — per §33.2 + §33.3. The session-resolution algorithm needs real-world validation; capture evidence in HRD-008's end-to-end test extension. **Open HRD-012.**

After those five, the first-implementation cycle is verifiably complete and Herald is consumable as a submodule by a real project.

§5. Long-form pointers

- docs/specs/mvp/specification.V3.md — full active spec.
- docs/specs/mvp/specification.V3.md#30-v2-self-review-log — every review pass (§30.1..§30.8) documented for any future archaeology.
- docs/guides/HERALD_CONSTITUTION.md — Herald-specific articles §101..§106 extending Universal Constitution.
- docs/guides/CONSTITUTION_INHERITANCE.md — parent-discovery + inheritance-gate contract.
- tests/test_constitution_inheritance.sh — the gate. Run before every commit that touches root docs.
- tests/test_constitution_inheritance_meta.sh — paired §1.1 mutation proof.
