Last modified	2026-05-28
Status	active
Status summary	r29 (v0.6.0 Wave 7 T11 — multi-channel §11.4.85 stress+chaos) marks HRD-120 Open→in_progress. Extended pherald/cmd/pherald/listen_stress_chaos_test.go (HRD-126's single-channel scaffold) with two W7-specific multi-channel tests: TestListen_MultiChannel_StressBurst (2 channels × 200 concurrent events → 400 unique IDs all dispatched exactly once + per-channel attribution via perChannelCountingReplier keyed on rcpt.Channel proves the channelRouter doesn't cross-wire; ~9-19k events/s under -race) + TestListen_MultiChannel_ChaosOneChannelDies_OtherKeepsGoing (the fan-in concurrency proof — tgram errors immediately, slack ticks 50 events at 2ms; assertion conjunction ≥5 slack dispatches landed BEFORE tgram fail-loud teardown AND the tgram error is tagged channel="tgram-stub" + subscribe → only true under a CONCURRENT goroutine orchestration, not a strictly-serial one). runListen contract: fail-loud-tears-down-siblings (pherald/cmd/pherald/listen.go:387-398); per-channel supervised restart is a deferred Wave 8 design and the doc-comment warns against silent change. 12/12 PASS over -race -count=3 (3 iterations × 2 new + 2 sibling HRD-126 tests); race-detector clean. Evidence anchors multichannel_no_drop_under_burst=1 (stress) + multichannel_concurrency_proven=1 (chaos) at docs/qa/HRD-120-20260528T110000Z/. Prior r28 (v0.6.0 Wave 7 T10 — paired §1.1 mutation gate) marked HRD-119 Open→in_progress. tests/test_wave7_mutation_meta.sh ships 3 paired hermetic mutations against the Wave 7 multi-channel framework — M1 blank IsSelfEcho (echo-loop hazard), M2 drop slack channels.Register in init() (registry-resolution broken), M3 drop slack thread_ts append (reply threading degrades) — each mutated build observed FAIL on the matching e2e detector + restored byte-for-byte + post-restore PASS. New TestSlackRegisteredViaInit detector added to slack_test.go (it asserts channels.Names() contains "slack" — the only test that would FAIL under M2 specifically; without it M2 would silently "no tests to run" PASS-bluff). Gate run = 4 PASS / 0 FAIL (3 mutations + 1 quiescence assertion, no MUTATED W7 - residue in 3

Field	Value
	production target files post-restore). Reuses Wave 6 canonical lockfile + trap + assert_restored + pre-flight guard verbatim. FOREGROUND-ONLY (§107.y / feedback_no_concurrent_mutation_gates operator mandate). Prior r27 (v0.6.0 Wave 7 T9 — e2e multi-channel invariants) marked HRD-118 Open→in_progress. scripts/e2e_bluff_hunt.sh gains E124-E131 (8 invariants anchored to live test names already shipped in HRD-110..117): E124 channels registry (resolve + unknown-errors), E125 tgram self-filter post-Wave-7 generalization (TestSubscribeBotSelfFilter), E126 slack adapter (TestSlackSatisfiesChannel + auth.test + chat.postMessage + registry wiring + sc_anchor to T6 docs/qa), E127 LIVE Slack triple-guarded (HERALD_SLACK_BOT_TOKEN + HERALD_SLACK_CHANNEL_ID + grep TestSlack_Live_Send — the third guard prevents the §107 "no tests to run = exit 0 = PASS-bluff" gotcha when env is set but no live-test exists), E128 per-channel inbox isolation + content-addressed idempotency, E129 generalized IsSelfEcho (Username + UserID + empty-self echo-loop hazard), E130 multi-channel pherald listen wiring (TestListenWiresHandlerAndExitsOnCancel), E131 qaherald messenger.Build dispatch (tgram + slack + unknown-errors-loud + sc_anchor to T7 docs/qa). Prior r26 (v0.6.0 Wave 7 T8 — spec V3 r12→r13) marked HRD-117 Open→in_progress. Spec edits document the already-shipped Wave 7 framework + Slack: §11.0 gains the inbound-runtime extension note (commons_messaging/channels.Channel embeds commons.Channel + SendReplyGeneric + BotSelfIdentity + DownloadAttachment + init()-registered registry + generalized IsSelfEcho via `SelfIdentity{Kind: IdentityUsername
Issues	HRD-008, HRD-015, HRD-019..HRD-025, HRD-029..HRD-056, HRD-081, HRD-085..HRD-090, HRD-115..HRD-120, HRD-131 37 open / in-progress workable items. r17 (v1.0.0 Batch A): HRD-018 (commons_constitution package — Evaluator+emit+migrations+bundle-hash+mode-ladder, completing the constitution_audit write-through that was the remaining §107 PASS-bluff: RunOutcome.Audited set true with nothing persisted), HRD-026 (bundle-hash now persisted on every emitted event AND audit row for replay), HRD-027 (mode-ladder runtime config + 3 admin REST endpoints GET/PUT /v1/compliance/modes[:rule_id]) closed atomically Task→done, migrated
Issues summary	Issues→Fixed per §11.4.19. Evidence docs/qa/HRD-018-20260527T142556Z/ (real-PG emit→persist + admin-REST flip round-trips + §11.4.85 stress 512 emit→persist no-lost-writes + chaos 960 concurrent flips). Prior r16: HRD-122..HRD-130 (GAP-3 §11.4.85 stress+chaos suite) closed atomically as Completed + HRD-132 (Runner idempotency-window bug) closed as Fixed — 11 rows migrated Issues→Fixed; HRD-131 (SQLite SSOT migration Phase 1) remains OPEN (Phases 2-6 follow-on). r15: HRD-100 closed atomically (Wave 6 pherald inbound runtime — code-doc closure; live evidence operator-pending → T10b). r14: substrate upgrade only (Wave 4b TOON; no HRDs migrated). r12: HRD-016 closed atomically (Wave 3b pherald Runner live + e2e E37-E42 PASS or honest SKIP-with-reason when PG:24100 absent). r11: HRD-011 (Telegram live) closed atomically with live message_id=5 evidence. r10 doc-cleanup renumbered HRD-093 → HRD-099. r9: HRD-028 + HRD-098 closed (Wave 3a). Carry-over to Wave 3c: HRD-024 (iherald paging), HRD-033 (destructive-guard body), HRD-018..027 flavor-specific bindings, plus the rest of the §43 command catalogue.

Per Universal §11.4.74 every new row carries a `Catalogue-Check` line in its `References` cell (one of `reuse|extend|no-match <org/repo>@<sha>`). For HRDs whose catalogue-check is still pending, the row records `no-match (2026-05-20)` — operators reviewing the implementation PR will re-verify.

ID	Type	Status	Criticality	Title
HRD-015	task	open	low	Inheritance gate I8 invariants for Go scaffold (go.work + commons/typ passes) cherald constitution bindings — cherald/internal/bindin cherald-owned §42.3 rules as concrete commons_constitution. through 5 event classes (.policy.violation/.gate.failed/.gate.recovered/. over the Batch-A emit+persist+audit foundation; POST /v1/compl surface drives detect→emit→persist→audit, visible on the existing GE pull surface. Vertical-slice bespoke detectors landed (§11.4.29 naming §11.4.44 doc-revision-header, §11.4.18 script-docs, §11.4.73 spec-drift remaining 25 rules use the shared marker-check mechanism (verdict d catalogue command / sweep) with the full emit-routing framework in p remaining bespoke detector is per-rule follow-up.
HRD-019	task	in_progress	high	sherald host-safety + repo-safety constitution bindings — sher al bindings Pipeline registers the 15 sherald-owned §42.3 host/repo-sa §11.4.24/.26/.32/.36/.41/.47/.71, §12.1/.2/.3/.6) as concrete commons_constitution.Evaluator impls routed through 6 S (.host.safety.breach/.repo.safety.breach/.gate.re over the Batch-A emit+persist+audit foundation, mirroring the proven pattern. The 3 named DETECTION hooks landed as REAL pure class detector (§9.1: rm/git-reset/clean without backup → .repo.safety interceptor (§11.4.41/§9.2: force-push without merge-first OR session- .repo.safety.breach), mem-budget watcher (§12.6: reported u .host.safety.breach) — plus forbidden-host-op (§12.1) + prer remaining rows. CRITICAL §12-safety: every detector DETECTS+RE string description; NONE performs the destructive op, force-pushes, s allocates memory (the mem-budget watcher reads a fabricated fraction §43 command bodies (HRD-033/046/056) supply the live op-intercept

HRD-021 task in_progress middle

bherald CI/test bindings — bherald/internal/bindings P
bherald-owned §42.3 CI/test gate-result rules (§1, §1.1,
§11.4.2/.3/.4/.5/.7/.9/.13/.14/.24/.27/.30/.39/.43/.46/.48–.52/.67) as con
commons_constitution.Evaluator impls routed through 3 e
(.gate.failed/.gate.recovered via the build/test gate-result
.policy.violation+.repo.safety.breach for the shared
row) over the Batch-A emit+persist+audit foundation, mirroring the pr
Pipeline pattern. bherald is the BUILD/CI flavor; it emits CI/test gate-
that integrate with the consuming project's CI workflow. 3 bespoke pu
result classification (§1/§11.4.50 — PASS/FAIL/flaky from a recorded
.gate.failed/.gate.recovered), test-tier-verify (§11.4.27/§4
matrix; a missing tier FAILs), anti-bluff-PASS detection (§11.4.2/.5 —
WITHOUT a captured-evidence artefact is a §11.4 PASS-bluff → FAI
shared marker-check mechanism (verdict decided upstream by the §43
full emit-routing framework in place.

HRD-022 task in_progress middle

rherald release constitution bindings — rherald/internal/b
registers the 4 rherald-owned §42.3 release-lifecycle rules (§4 tag mirr
multi-format export [shared with cherald], §11.4.38 installable-asset ev
retest before release tag) as concrete commons_constitution.E
through 2 event classes (.release.gate.blocked via the existin
ReleaseGateBlocked emitter surface for §4/§11.4.38/§11.4.40 +
for the shared §5 changelog row; a release recovery maps to the shared
companion since the release class family has no distinct "recovered" le
emit+persist+audit foundation, mirroring the proven HRD-019/020/02
the RELEASE flavor. 4 bespoke PURE detectors landed: tag-mirror-p
parent but missing on any owned mirror, with_tag<mirrors, →
.release.gate.blocked), changelog-conformance (§5 — non-
changelog OR stale multi-format export → .policy.violation).
(§11.4.40 CRITICAL — tag attempted without a green all-8-§40.2-tier
.release.gate.blocked), installable-asset-evidence (§11.4.38 -
install check → .release.gate.blocked). CRITICAL §12-safe
CLASSIFIES a recorded release-op outcome string; NONE tags, push
downloads, or installs — the live release-op interception is scope-lock
(HRD-031/032/045).

HRD-023 task in_progress middle

pherald project bindings (§2 commit+push, §3 submodule propagat

bindings/ Pipeline + §42.3-owned rule set + 5 bespoke PURE dete
discipline / submodule-propagation-order / pre-push-fetch-guard / fetc
through the commons_constitution Evaluator+audit foundation; -race -
Live op-interception deferred to §43 HRD-029/030/043/044/049/053.

HRD-024 task in_progress middle

iherald constitution-rule escalation bindings (§11.4.10/.10.A creden
+ §11.4.66 operator-blocked escalation) — Batch B: iherald/inte
Pipeline routing .credential.leak (forced-critical) + .policy
detectors wired through commons_constitution Evaluator+audit; -race
no-real-secret attestation. Live paging deferred to §43 / HRD-024-pagi

HRD-025 task in_progress low

scherald scheduled-audit bindings (§11.4.45 periodic Status.md sw
compliance digest) — Batch B: scherald/internal/bindings
.policy.violation + 3 bespoke detectors (status-sweep / digest-

ID	Type	Status	Criticality	Title
				through commons_constitution Evaluator+audit; -race -count=3 green; scheduler deferred to §43 HRD-047.
HRD-029	task	in_progress	middle	§2 pherald commit-push — single-entripoint locked commit + C: implemented as gitops command (§11.4.74 wrap of git binary); --en hermetic temp-repo tests -race green
HRD-030	task	in_progress	middle	§3 pherald submodule propagate — owned-submodule wall Batch C: implemented as gitops command (§11.4.74 wrap of git binary) binding; hermetic temp-repo tests -race green
HRD-031	task	in_progress	middle	§4 rherald tag mirror — assert tag exists on every owned sub implemented as rherald §43 release command (rherald/cmd/rherald_release_cmds.go) feeding the HRD-022 rherald binding; reuses s hermetic -race green
HRD-032	task	in_progress	low	§5 rherald changelog generate — Conventional Commits - <v>.md + multi-format export — Batch C: implemented as rherald § (rherald/cmd/rherald/release_cmds.go) feeding the HR reuses shared commons/gitops; hermetic -race green
HRD-033	task	in_progress	high	§9.1 sherald destructive guard <op> — wrap rm/git-rese prerequisite checks — Batch C: implemented as sherald §43 command sherald/sysops_cmds.go) feeding the HRD-020 sherald binding (detects+classifies+exits-nonzero, never performs the op); hermetic -ra fix so the CLI runs without a JWT secret
HRD-034	task	in_progress	middle	§9.3 sherald backup-snapshot <target> — hardlinked sn straggler: implemented in sherald/cmd/sherald/sysops_cm refuses overwrite, classifies §9.3 SubjectBackup → .gate.recover equality -race green
HRD-035	task	in_progress	middle	§11.4.2 bherald evidence capture <test_id> — capture Batch C: implemented as bherald §43 build/CI command (bherald/build_cmds.go) feeding the HRD-021 bherald binding; hermetic -
HRD-036	task	in_progress	high	§11.4.10 cherald creds scan — gitleaks/trufflehog integration, .credential.leak — Batch C: implemented as cherald §43 verify (cherald/cmd/cherald/checkops_cmds.go) feeding the HR detect-only; hermetic -race green (routed to §11.4.10 credential-leak; f secret value printed)
HRD-037	task	in_progress	low	§11.4.12 cherald docs sync — regen Issues_Summary / Fixed_ Status_Summary — Batch C: implemented as cherald §43 docs-pipel cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald - - apply to regenerate; ships the §107 lazy-verifier fix so the CLI run hermetic -race green
HRD-038	task	in_progress	low	§11.4.18 cherald script-docs check — assert sibling .md fo Batch C: implemented as cherald §43 verify/check command (cher checkops_cmds.go) feeding the HRD-019 cherald binding; detect (routed to §11.4.60 — §11.4.62 has no cherald rule)
HRD-039	task	in_progress	low	§11.4.19/.23 cherald fixed align+cherald colorize- HTML colorizer — Batch C: implemented as cherald §43 docs-pelin cmd/cherald/docops_cmds.go) feeding the HRD-019 cherald - - apply to regenerate; ships the §107 lazy-verifier fix so the CLI run hermetic -race green
HRD-040	task	in_progress	high	§11.4.26 sherald constitution pull — wrap fetch + rebase .bundle.updated — Batch C: implemented as sherald §43 comm

ID	Type	Status	Criticality	Title
				sherald/sysops_cmds.go) feeding the HRD-020 sherald binding (detects+classifies+exits-nonzero, never performs the op); hermetic -race fix so the CLI runs without a JWT secret
HRD-041	task	in_progress	middle	§11.4.27 bherald test-tier verify — 8-tier matrix verification implemented as bherald §43 build/CI command (bherald/cmd/bherald_build_cmds.go) feeding the HRD-021 bherald binding; hermetic -race green
HRD-042	task	in_progress	low	§11.4.31 cherald submanifest verify — Submodule-Dependency Batch C: implemented as cherald §43 verify/check command (cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-043	task	in_progress	high	§11.4.36 pherald install-upstreams — install_upstreams wrapper implemented as gitops command (§11.4.74 FindScript-resolved constants); HRD-023 binding; hermetic temp-repo tests -race green
HRD-044	task	in_progress	middle	§11.4.37 pherald fetch-guard — pre-edit fetch + rebase enforcement implemented as gitops command (§11.4.74 wrap of git binary); --emit-only; hermetic temp-repo tests -race green
HRD-045	task	in_progress	high	§11.4.40 rherald gate retest — pre-tag full-suite retest gate -enforce Batch C: implemented as rherald §43 release command (rherald/cmd/rherald_release_cmds.go) feeding the HRD-022 rherald binding; reuses shared commons/gitops; hermetic temp-repo tests -race green
HRD-046	task	in_progress	high	§11.4.41 sherald force-push gate — merge-first + per-session Batch C: implemented as sherald §43 command (sherald/cmd/sherald_sysops_cmds.go) feeding the HRD-020 sherald binding; PRE-FLIGHT (detects+classifies+exits-nonzero, never performs the op); hermetic -race fix so the CLI runs without a JWT secret
HRD-047	task	in_progress	middle	§11.4.45 / .56 scherald status-digest — periodic Status.md regeneration — Batch C straggler: implemented in scherald/cmd/scherald_status_cmds.go feeding the HRD-025 scherald binding (§11.4.45 status-sweep; detect-by-regenerates Status_Summary); hermetic -race green
HRD-048	task	in_progress	low	§11.4.53 cherald fixed-summary sync — standalone Fixed_Summary Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/docops_cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-049	task	in_progress	middle	§11.4.55 pherald reopen <HRD-NNN> — Issues→Fixed reverses Batch C: implemented as gitops command (the Wave 6.5 inbound Fixed_Summary emit feeds HRD-023 binding; hermetic temp-repo tests -race green
HRD-050	task	in_progress	middle	§11.4.59 cherald readme sync — README doc-link regen + reindex Batch C: implemented as cherald §43 docs-pipeline command (cherald/cmd/docops_cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret
HRD-051	task	in_progress	high	§11.4.60 cherald composite-gate — canonical implementation of COMPOSITE-SYNC — Batch C: implemented as cherald §43 verify/check (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-052	task	in_progress	middle	§11.4.65 cherald export — bulk Markdown export wrapper (md_export.go) implemented as cherald §43 docs-pipeline command (cherald/cmd/docops_cmds.go) feeding the HRD-019 cherald binding; detect-by-regenerate; ships the §107 lazy-verifier fix so the CLI runs without a JWT secret

ID	Type	Status	Criticality	Title
HRD-053	task	in_progress	high	§11.4.71 pherald pre-push — fetch + investigate + integrate hooks as gitops command (§11.4.74 wrap of git binary); --emit feeds HRD-019 repo tests -race green
HRD-054	task	in_progress	middle	§11.4.73 cherald spec-version check — Revision-vs-edits implemented as cherald §43 verify/check command (cherald/cmd/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-055	task	in_progress	middle	§11.4.74 cherald catalogue-check <pr> — scan PR for Catalogue runner over vasic-digital + HelixDevelopment — Batch C: implemented as cherald §43 verify/check command (cherald/cmd/cherald/checkops_cmds.go) feeding the HRD-019 cherald binding; detect-only; hermetic -race green
HRD-056	task	in_progress	high	§12.6 sherald mem-budget watch — daemon-mode 60% threshold .host.safety_breach — Batch C: implemented as sherald §43 verify/check command (sherald/sysops_cmds.go) feeding the HRD-020 sherald binding; detect-only; hermetic -race green GATE (detects+classifies+exits-nonzero, never performs the op); hermetic verifier fix so the CLI runs without a JWT secret
HRD-081	task	open	low	Extend digital.vasic.containers/pkg/compose to detect docker compose runtime and either emit runtime-appropriate flags (none for compose) or fall back to host-side healthcheck polling. Composes with compose.WithWait(true) works across both backends. Also fix podman-compose ps output (returns 0 services even when containers are running directly). Per §11.4.76: extend upstream submodule, never reimplement
HRD-085	task	in_progress	middle	Implement single-task admin operations on commons_infra.pgxtask.GetByID, Update, Delete. Required for Requeue + MoveToDead operator tooling. Currently all three return ErrUnsupported (HRD-085). BackgroundTask row by ID; full-row Update including JSONB column decision per §107.
HRD-086	task	in_progress	middle	Implement worker-side running-task state mutations on commons_infra.pgxtaskRepository — UpdateStatus, UpdateHeartbeat, SaveCheckpoint. Required by River worker reaper. Currently all four return ErrUnsupported (HRD-086). State guarded by valid-state-machine check; progress as (float64, message) updated_at = now() writeback; checkpoint as opaque []byte task row.
HRD-087	task	in_progress	low	Implement admin / stats / audit reads on commons_infra.pgxtaskRepository — GetByStatus, GetPendingTasks, CountByStatus, GetTaskQueue, v1/queue/* introspection endpoints + Peek delegate. Currently all return ErrUnsupported (HRD-087). Scope: status-filtered paginated read; Peek; status-bucketed counts; per-task execution-history rows from the task_execution_history table.
HRD-088	task	in_progress	middle	Implement queue-recovery reads on commons_infra.pgxtaskRepository — GetStaleTasks, GetByWorkerID. Drives the stuck-task reaper loop. Currently both return ErrUnsupported (HRD-088). Scope: status-filtered against updated_at; per-worker assignment lookup for re-dispatch
HRD-089	task	in_progress	low	Implement resource-monitor I/O on commons_infra.pgxtaskRepository — SaveResourceSnapshot, GetResourceSnapshots. Persists resource samples for capacity-planning + post-mortem. Currently both return ErrUnsupported (HRD-089). Scope: append-only insert keyed by (task_id, capacity) paginated read in reverse-chronological order. Schema target: a task_execution_history table not yet in the §9.6 migration set — adding it is part of this HRD.

ID	Type	Status	Criticality	Title
HRD-090	task	open	middle	Implement dead-letter handling on <code>commons_infra.pgxTaskRep</code>. MoveToDeadLetter. Required failure path when a task exhausts re invariant. Currently returns <code>ErrUnsupported</code> (HRD-090). Scope BackgroundTask row to a <code>dead_letter_tasks</code> table with the fail row JSONB snapshot; emit a <code>.queue.dead_letter</code> event via COM per §42.1. Schema target: a <code>dead_letter_tasks</code> table not yet in t adding it is part of this HRD. Wave 7 T6 — Slack channel adapter (Socket Mode): <code>commons_mes</code>. <code>slack/</code> implements <code>channels.Channel</code> — New/NewWithBase parsing <code>slack://<bot-token>@<workspace>/<channel-id></code>. ID	Type	Status	Criticality	Title
HRD-120	task	in_progress	high	flight dirty-tree-and-residue guard + byte-for-byte assert_restore ONLY (§107.y / no-concurrent-mutation operator mandate). Wave 7 T11 — §11.4.85 multi-channel stress + chaos. Extended HRD: pherald/listen_stress_chaos_test.go (NOT duplicated TestListen_MultiChannel_StressBurst (2 channels × 200 ONE runListen — pins no-loss/no-double + per-channel attribution perChannelCountingReplier keyed on rcpt.Channel prov NOT cross-wire; throughput ~9-19k ev/s under -race; clean shutdown TestListen_MultiChannel_ChaosOneChannelDies_0th fires 1 event then errors; slack ticks 50 events at 2ms — pins concurrent via conjunction: ≥5 slack dispatches landed BEFORE fail-loud teardov surfaces tagged channel="tgram-stub" + subscribe). 12/12 - count=3 (3 iterations × 2 new + 2 sibling HRD-126); race-detector found: fail-loud-tears-down-siblings (per-channel supervised restart i doc-comment warns against silent change). Evidence anchors: multichannel_no_drop_under_burst=1 (stress) + multichannel_concurrency_proven=1 + multichannel_one_channel_death_surfaced=1 (chaos). Migrate text HRD trackers to versioned SQLite single-source-of-truth 6-phase) — DB committed as authoritative SSoT per operator mandate item): file the scope-locked tracking HRD. Phase 2: scaffold/adopt the already lives in the constitution submodule (constitution/script items/) — Herald references it per §11.4.74 catalogue-first and never sync md→db (load docs/Issues.md / docs/Fixed.md / *_Summary.md / docs/CONTINUATION.md §3 into docs/.workable sync db→md byte-identical (round-trip regeneration so MD[?]DB drift impossible). Phase 5: generator shims (the *_Summary.md variants become derived from the DB). Phase 6: prohibit text-direct edits (release the only authoring surface). Operator divergence from the parent §11.4 regeneration default: for Herald the DB IS the authoritative artefact — docs/.workable_items.db is version-controlled (committed), but only the transient WAL/SHM sidecars (docs/.workable_items.db gitignored ("We should not git ignore our workable items database since truth regarding items we have to do on the project!"). Scope-lock: this row) + Phase 2 adoption ONLY. Phases 3-6 (md→db sync, db→md generator shims, text-direct-edit prohibition) are follow-on work-items completes, so the §106 spec-change / §107.x evidence invariants are n
